## **CM Labs Partners with Antycip Simulation to Establish Local Presence in Europe**

*European construction and ports sectors now have direct access to improved workforce training and development solutions*

**Montreal, QC, April 2, 2019** — CM Labs Simulations, developer of Vortex® training simulators, today announced that they have expanded into Europe via a strategic partnership with Antycip Simulation, Europe’s leading provider of professional-grade simulation software.

While CM Labs’ headquarters continue to be located in Montreal, Canada, the company now maintains branches in Antycip offices in the UK, France, and Italy, facilitating hands-on demonstrations of simulation-based learning solutions at all three locations.

Through its presence in Antycip offices, CM Labs now provides local solution set-up, training, and support to clients throughout Europe, including Austria, Belgium, Denmark, Finland, Germany, Iceland, Luxembourg, The Netherlands, Norway, Spain, Sweden, and Switzerland.

“This is an exciting partnership for both companies,” says Patrice Commune, CM Labs’ Chief Revenue Officer. “It combines CM Labs’ innovative training solutions with Antycip’s over two decades of leadership in providing simulation software across Europe.”

“We’re exceptionally pleased to be working with CM Labs, as the European provider of the industry’s leading simulation-based training solutions,” says Michel Pronier, CEO of Antycip Simulation. “The result is a net benefit for the construction and ports sectors in Europe, as there are now simply better options when it comes to leveraging simulation to train and develop a workforce that is facing a skills shortage.”

The announcement follows the conclusion of a highly successful series of events gathering CM Labs, Antycip Simulation, and UK training leaders to discuss approaches to improving workplace training with simulation.

## **About CM Labs Simulations**

For over 20 years, CM Labs' Vortex simulators and services have helped train crane and heavy equipment operators all over the world. Today, CM Labs is the largest simulator vendor in the market, with over 1,000 simulators in 30 countries deployed with Vortex software. CM Labs' feature-rich Vortex Simulators provide immersive, ultra-realistic learning environments that promote increased safety and operational efficiency, essential skills development, and reduced training costs. Developed by operators, instructors, and simulation experts, our standards-based solutions prepare operators for the real world.

Our clients include IUOE, Kiewit, Liebherr, Mammoet, Manitowoc, NASA, and over 100 other world-class companies, OEMs, equipment operators, and trades training organizations.

## **About Antycip Simulation**

Since 1996, Antycip Simulation has supported customers across the globe, in defence, academia, commerce and industry, to become better at what they do. As an expert provider of simulation, analysis, modelling, display and virtual reality solutions, Antycip Simulation combines its in-house technical expertise with an unrivalled range of products from software and hardware providers. Antycip Simulation is a subsidiary of ST Electronics (Training & Simulation Systems).
